Data to support the writing of examination reports

How do the number of entries and results for each grade at your centre compare with those locally?

The source of this data is Ofqual. The full set can be found [here](#). It may be interesting however, to calculate what proportion of entries your school made in comparison to the entries for the whole county and nationally. This could be compared with the size of your year 11 cohort as a proportion of the county year 11 cohort.

The formatting indicates where the results for each grade are above (green) or below (pink) the average for England for each grade. The number of entries for a county would affect the statistical validity of this comparison.
